Subject: Question about OATHILL Lake

Dr. Mandavile

we spoke sometime ago and I would appreciate knowing if you would have specific information about OATHILL Lake (physical characteristics, productivity) in your web page. Also, I would like to know if you would be able to give a lecture to the Limnology class in relation to the current monitoring of lakes in Nova Scotia. I know this is a short notice,
but if feasible Nov 19 or 21 it would be great.

Please let me know,

Angelica Silva
