Hi Shalom:
Thanks for the response.
Due to my wife's schedule, we cannot meet this week.
Can we meet Monday (March 10) afternoon at 2 o'clock?

Let me know if the date and time are convenient for you. You can provide us with address of the meeting place.

Thanks.

Michael

Providing services in algal and zooplankton analyses

I used to operate my company in Edmonton, Alberta and moved to Halifax in 2002 to join my spouse who teaches at St. Mary's University. I am presently an adjunct professor at the same university. I would like to inform you of my presence in Halifax and to ask of any limnological work going on the Halifax Regional Municipality at the moment. You can visit my website (appended) for details about the services provided by my company.

> > 2) My wife has some honours students at St. Marys who are interested in doing some projects on aquatic ecology and would me to collaborate on this project. My wife ia an entomologist (but did very little work on aquatic insects). I am an algal taxonomist with some knowledge of macroinvertbrates. We intend to look at periphyton and macroinvertebrates populations in selected lakes and their relation to water quality variables.
Basically we intend to choose, as much as possible, s number of lakes with high human disturbance, moderate human disturbance and no (or negligible) human impact and sample for periphyton and macroinvertebrates. For chemical variables we will determine major ions and nutrients as well as some physical parameter. If resources permit we might also analyse for heavy metals/trace elements.
> > We are new to this area (my wife has been here for almost 2 yrs) and we thought you could help us with the selection of the lakes. We can discuss details. We are putting up a proposal now and want to have an idea of what we will be doing within a week or so.
