Subject: Maynard Lake Purification Project

Hello Shalom,

I found your web site (thanks! very nice!) while searching for information on the technique for purifying water through scallop shells:

<http://lakes.chebucto.org/WATERSHEDS/MAYNARD/maynard.html#subcommittee>

Has anything further transpired on this experiment since the subcommittee was formed in April, 2003?

Do you know how I can contact any of the members of that subcommittee about their research and patent application?

Thanks!

Best wishes,
Terry
